PROFILE

Full Stack Software Engineer with **4+ years of experience** building enterprise applications using **React, Next.js, Node.js, TypeScript, micro-frontends, microservices, REST APIs**, and **Azure**. Experienced in performance optimization, secure application development, production troubleshooting, automated **deployments**, and testing, with hands-on experience building **AI/LLM-powered applications**.

PROFESSIONAL EXPERIENCE

Full Stack Engineer, TDCX

02/2026 – 09/2026

- Contributed to an AI-powered internal Agent Assist platform for CX/support agents, using **React, Next.js, Node.js and TypeScript** across feature development, bug fixing, maintenance and testing.
- Owned enhancements to the **Chrome Extension/Widget** using **Plasmo and React**, including the V2 interface, responsiveness fixes and integration with the shared Node.js backend.
- Built the **Contact Support** workflow from scratch using React and API integration, automating acknowledgement emails to customers and support agents; worked with **Redis caching** and Claude via VS Code for code quality and bug fixing.

Full Stack Developer, Tata Consultancy Services

06/2023 – 01/2026

- Modernized a high-traffic **UK mortgage automation platform** for a global financial-services client using **React, TypeScript, micro-frontends, Node.js and microservices**, integrating REST APIs through Azure API Management.
- Implemented **caching, lazy loading and parallel data fetching**, reducing application load time from approximately **3 seconds to milliseconds** and contributing to **~35% lower API latency**.
- Automated production deployment activities, reducing **manual deployment effort by ~90%**, and supported end-to-end releases through Azure DevOps.
- Improved existing application security using **JWT, authentication, authorization and RBAC** within a security-focused banking environment.
- Developed unit tests using **Jest and React Testing Library**, contributing to **95%+ test coverage**, and used Dynatrace for production diagnostics and troubleshooting.
- Collaborated in an **8-member Agile/Scrum team** through sprint planning, refinement, estimation, code reviews, technical discussions and mentoring.

Software Engineer Trainee, Revidd

06/2022 – 05/2023

- Developed a **Video-on-Demand (OTT) platform** using React, Redux, TailwindCSS, Material UI and GraphQL for multi-device playback and adaptive UI rendering.
- Built no-code customization modules using a GraphQL CMS, enabling non-technical users to configure OTT themes and reducing developer support effort by **40%**.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React, Next.js, Redux, Micro Frontends, TailwindCSS, Material UI

Backend: Node.js, Express.js, REST APIs, Microservices, Redis, MongoDB

Cloud & DevOps: Azure, Azure API Management, Docker, Azure DevOps, GitHub Actions, CI/CD

Security, Testing & AI: JWT, Authentication, Authorization, RBAC, Jest, React Testing Library, Dynatrace, SonarQube

PROJECTS

AI Agent for Automated User Story Breakdown, React, Node.js, Gemini Pro, GPT-4, Docker

- Led a **5-member team** in a 6-hour hackathon to convert user stories into structured, role-based technical tasks using LLM-powered processing and validation.

Automated Programming Evaluation, MERN, RBAC, GitHub Actions

- Built a programming evaluation platform supporting **C, C++, Java and Python**, with role-based access, automated test-case evaluation and CI/CD; tested with **60+ users**.

ACHIEVEMENTS

- 2nd Prize - TCS AI Fridays Hackathon** for developing the AI Agent for User Story Breakdown.
- Certificate of Excellence - Lloyds Banking Group CIO** for leading mortgage process automation.
- TCS Top Coders - Top 3%** among 7,000+ developers.
- TCS CodeVita Season 10 - Global Rank 3604** among 100K+ participants.

EDUCATION

GMR Institute of Technology, Bachelor of Technology

Department : Information Technology, CGPA: 8.22/10

2019 – 2023
