PROFESSIONAL EXPERIENCE

Full Stack Developer, Tata Consultancy Services

Jun 2023 – present

- Modernized legacy applications into **React + Node.js with SSR**, applying **system design principles** (AKS, Key Vault, modularization, CORS, Helmet) to deliver secure and scalable enterprise solutions.
- Developed **scalable full-stack solutions** (React.js, Node.js, TypeScript, Azure) with automation-first approach, cutting manual effort by **90%** and improving load times up to **3x**.
- Designed and integrated **secure APIs & microservices** with Azure APIM, leveraging certificate-based authentication and in-memory caching to achieve **2.5x faster responses**.
- Optimized system performance using **caching, lazy loading, and parallel processing**, reducing API latency by **35%** and enabling cost-efficient scalability.
- Achieved **100% unit test coverage** with Jest and enforced **SonarQube quality gates**, ensuring **zero production defects** and strong CI/CD pipeline governance.
- Hands-on in **end-to-end deployments** via Azure DevOps pipelines, including CR/iCAZ approvals, release builds, wellness checks, and production go-lives.
- Delivered 95% sprint completion rate by collaborating with stakeholders in Agile teams.

Software Engineer Trainee (Intern), Revidd

Jun 2022 – May 2023

- Built a VOD OTT platform using React, Redux, Tailwind CSS, and MUI.
- Integrated GraphQL CMS and launched no-code builder, enabling non-tech users to customize OTT platforms.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C

Frontend: React, Next.js, Redux, Tailwind CSS, MUI, Bootstrap, Context API (SSR/SSG)

Backend: Node, Express, REST, GraphQL, JWT, Microservices

Databases: MongoDB, SQL, Firebase

DevOps & Tools: Docker, Kubernetes, Azure DevOps, Git, CI/CD, SonarQube, Dynatrace, Postman

Testing & Others: Jest, Postman, Playwright, Bruno, CI/CD, Figma, Jira

EDUCATION

Bachelor of Technology, GMR Institute of Technology

2019 – 2023

Department : Information Technology, **CGPA:** 8.22/10

PERSONAL PROJECTS

Automated Programming Evaluation | MERN

- Real-time code execution for C, C++, Java, Python with role-based access and test-case grading.
- CI/CD with GitHub Actions, tested with 60+ users, responsive Tailwind UI and MaterialUI.

Result Analytics Portal | React + Node

- Designed role-based academic result portal with backend filtering, CGPA/backlog tracking, and Excel upload. Faculty dashboards support export and bulk uploads.
- Added filtering/export in faculty dashboards and dynamic reports.

ACHIEVEMENTS AND CERTIFICATIONS

- Awarded **Certificate of Excellence** by CIO of Lloyds Banking Group for driving mortgage automation.
- Ranked in Top 3% among 7,000+ developers in TCS Top Coders for coding excellence.
- Achieved **Global Rank 3604 among 100K+ participants** in TCS CodeVita Season 10.
- Microsoft Certified: **Azure Fundamentals (AZ-900)** – Cloud services, security, and governance.
- Completed **React – The Complete Guide (Udemy)** to strengthen modern front-end development expertise.
- Completed **Node.js, Express, MongoDB Bootcamp (Udemy)** to enhance back-end & database development skills.
